PROFESSIONAL SUMMARY

Senior Unity Developer with 3+ years of experience building mobile games, AR/VR applications, multiplayer systems, and custom Unity tools. Strong in C#, gameplay architecture, performance optimization, editor scripting, and cross-platform delivery across Android, iOS, WebGL, and VR platforms. Experienced in leading teams, mentoring developers, and shipping production-ready features from prototype to release.

CORE HIGHLIGHTS

- ▶ Led a 6-member cross-functional team on a third-person mobile RPG.
- ▶ Published Overhaul Mesh Collider, a Unity editor tool for collider automation and workflow speed.
- ▶ Built AR/VR experiences for AR Foundation, Meta Quest, and mixed-reality workflows.
- ▶ Shipped performance-critical systems using Burst, Jobs, GPU Instancing, and WebGL optimization.

TECHNICAL SKILLS

Unity & Programming

Unity 3D

Unity 6

C#

OOP

Gameplay & Systems

Gameplay Programming

AI Systems

Design Patterns

SOLID

Async Programming

ScriptableObjects

Addressables

Input System

Combat Systems

Animation Systems

Physics

UI Toolkit

Unity UI

Custom Editor Tools

Performance & Graphics

Unity Profiler

Memory Optimization

Burst Compiler

Jobs System

GPU Instancing

Object Pooling

URP

Shader Graph

HLSL

Compute Shaders

Multiplayer & Backend

Photon PUN

Networking

Matchmaking

RPCs

REST APIs

Firebase

JSON

AR/VR & Platforms

AR Foundation

XR Interaction Toolkit

Meta Quest 2/3

Apple Vision Pro

Android

iOS

WebGL

IL2CPP

Tools

Git

GitHub

Jira

Agile/Scrum

Blender

Photoshop

PROFESSIONAL EXPERIENCE

Independent Unity Developer | [Freelance](#)

Apr 2026 - Present

- Develop Unity prototypes, gameplay systems, and technical demonstrations for personal projects and short-term contracts.
- Build interactive WebGL experiences focused on shaders, procedural generation, simulation, and performance optimization.
- Create reusable Unity systems, editor tools, and workflows to improve development speed and maintainability.

Unity Technical Developer | [Kloth](#) (Contract)

Jan 2026 - Apr 2026

- Developed advanced cloth simulation and fit-evaluation systems using Unity, C#, Burst, Compute Shaders, and HLSL.
- Built automated 3D processing pipelines for model alignment, simulation, rendering, and image generation.
- Worked on geometry alignment, cloth handling, and other performance-critical workflows for production use.

Unity Team Lead | [Mayaavi Interactive LLP](#)

Dec 2024 - Jan 2026

- Led a 6-member cross-functional team across Unity, frontend, and backend development for a third-person mobile RPG.
- Developed combat systems, enemy AI behaviors, weapons, bosses, and animation-driven gameplay.
- Improved performance using Burst, Jobs, GPU Instancing, occlusion culling, and frustum culling.
- Replaced Animator-heavy workflows with a code-driven Animancer architecture and built ScriptableObject/editor tool workflows.

Unity AR/VR Developer | [Futuristic \(Contract\)](#)

Jan 2024 - Apr 2024

- Built AR Foundation applications with image tracking and interactive 3D content.
- Developed Meta Quest VR experiences with hand tracking and controller interactions.
- Gained hands-on experience with Apple Vision Pro mixed-reality workflows.

Unity Developer & Trainer | [The UpThrust \(Contract\)](#)

Apr 2024 - Jul 2024

- Trained students in Unity development, C#, and production workflows.
- Guided debugging, architecture, and optimization practices.

Junior Unity Developer | [WebMobril Gaming Studioz](#)

Oct 2022 - Dec 2023

- Developed mobile and multiplayer games using Unity and C#.
- Implemented Photon PUN networking, matchmaking, synchronization, and multiplayer gameplay systems.
- Integrated REST APIs, Firebase, and backend-driven features.
- Delivered Android, iOS, and WebGL builds and developed internal editor tools to automate repetitive tasks.

SELECTED PROJECTS

Overhaul Mesh Collider

[View Project](#)

Unity editor tool that automates collider setup for complex meshes, reducing manual physics setup and improving workflow speed.

Ocean Tank

GPU water simulation with custom shaders, planar reflections, procedural environment elements, and WebGL optimization.

Physics Sandbox

Burst-optimized cellular simulation with sand, water, fire, smoke, and electricity.

EDUCATION

B.Sc. Information Technology

2019 - 2022

Maharaja Ranjit Singh College of Professional Sciences, Indore
