

Jayant *Bodse*

Three years shipping Unity titles across mobile, AR, and VR — now building a portfolio of small, opinionated experiments in simulation and shader work.

01. STACK

ENGINES

Unity (primary, 6.x)
Godot · Unreal · Construct 3
· GDevelop

LANGUAGES

C#
TypeScript · JavaScript ·
HTML/CSS · PHP

SPECIALTIES

Editor scripting · Shader work ·
Simulation
AR Foundation · XR Toolkit
(Meta Quest) · Photon PUN
multiplayer

WEB

React · Next.js · Firebase · REST APIs

DCC & TOOLING

Photoshop · Blender · Audacity · Git ·
async pipelines · JSON-driven config

02. EDUCATION

2019 – 2022

BSc, Information Technology
Maharaja Ranjit Singh College
of Professional Sciences,
Indore

2017 – 2018

Higher Secondary (12th)
Marthoma H.S. School, Indore

03. STRENGTHS

Scalable architecture · performance
tuning · technical mentorship · cross-
platform delivery · workflow
automation · knowledge transfer.

04. LANGUAGES

English · Hindi

I build small, self-contained experiences — games, tools, simulations — that try to do *one thing well*. Three professional years across mobile multiplayer, AR Foundation, and Meta Quest VR; the last year spent independently shipping shader-driven Unity experiments on itch.io. Equal parts game dev and tool-smith — most days I'm extending the editor or rendering pipeline before I write a single line of gameplay.

05. EXPERIENCE

Independent Game Developer & Creative Coder

Mar 2025 – Present

Solo · self-directed

Shipping a portfolio of small-scope Unity experiments on itch.io: real-time water sim with ripple interaction, GPU particle galaxies, audio-reactive kaleidoscopes, ink simulation, procedurally-lit cathedrals. Each release is a self-contained study in **shader work**, **rendering pipelines**, and **tactile interaction** — built and shipped in days, not months.

Team Lead & Game Dev Mentor

Oct 2024 – Feb 2025

The Upthrust

Led a small Unity team and mentored junior developers through fundamentals, code reviews, and project hand-offs. Authored editor tooling — folder/hierarchy automation and an **image-to-sprite** pipeline — that standardised project setup across every new repo.

Senior Unity Developer

Apr 2024 – Sept 2024

Futuristic Business Solutions

Built a **Meta Quest VR sandbox** with Unity XR Toolkit (hand tracking, physics-based grab/throw, haptics; profiled for stable 6DoF). Developed an in-editor Custom Logger for filtered, color-coded, exportable runtime logs. Shipped a reusable async REST client (**HttpClient** · **async/await**) with token auth, retries, and JSON parsing; plus an AR Location quest system on AR Foundation + Mapbox with geofenced triggers.

Senior Unity Developer / Team Lead

Dec 2023 – Mar 2024

Rishu's Infotech

Led AR Foundation projects: **AR Coloring** (3D animated models aligned to children's drawings) and **Multi-Image AR Detection** (parallel image-target tracking with state-preserved content swapping). Mentored the team on cross-platform Android/iOS build pipelines.

Junior Unity Developer

Oct 2022 – Nov 2023

Webmobril Gaming Studios

Shipped a real-time **4-player Ludo Multiplayer** on Photon PUN: turn synchronisation, room/lobby creation, reconnect logic, anti-cheat validation, emoji chat, and matchmaking with dynamic UI transitions.

Earlier — Freelance Web & Game Developer (Dec 2021 — Sept 2022) · Web Dev Intern, Broadcast Co (Apr 2021 — Nov 2021).

Selected & shipped.

A reading list of recent Unity work — six independent 2026 releases on itch.io, then a slice of professional projects that defined the last three years.

INDEPENDENT

2026 • ITCH.IO

-
- | | | |
|-------|--|---|
| 01 | Ocean Tank
A miniature water tank with real-time ripple interaction. Custom water shader, surface tension feel, click-to-disturb. Unity • C# • Shaders | zxdelt.itch.io/oceantank |
| <hr/> | | |
| 02 | Sanctum
A small temple lit by coloured light — procedurally-rendered cathedral with stained glass, god-rays, and a mirror floor. Unity • C# • Shaders | zxdelt.itch.io/sanctum |
| <hr/> | | |
| 03 | Kaleidoscope
Audio-reactive procedural visuals — live music drives the geometry and colour fields in real time. Unity • C# • Reactive systems | zxdelt.itch.io/kaleidoscope |
| <hr/> | | |
| 04 | Particle Galaxy
A GPU-driven star simulation. Minimal interaction, maximal vibe — built around large-scale particle counts. Unity • C# • GPU | zxdelt.itch.io/particle-galaxy |
| <hr/> | | |
| 05 | Inkwell
A drawing surface that simulates the spread and bleed of ink. Toy by design; satisfying to use. Unity • C# • Simulation | zxdelt.itch.io/inkwell |
| <hr/> | | |
| 06 | Physics Sandbox
A toy physics playground for unstructured play — forces, materials, constraints, observation. Unity • C# • Physics | zxdelt.itch.io/physics-sandbox |
-

PROFESSIONAL

2022 — 2025

-
- | | | |
|-------|--|-------------------------------|
| 07 | Ludo Multiplayer (Photon PUN)
Real-time 4-player networked Ludo: turn sync, lobby/room creation, reconnect, anti-cheat, emoji chat. Unity • C# • Networking | Webmobril Gaming Studios |
| <hr/> | | |
| 08 | Meta Quest Object Interaction (XR Toolkit)
VR sandbox with hand tracking, physics-based grab/throw, haptics, profiled for stable 6DoF performance. Unity • XR • VR | Futuristic Business Solutions |
| <hr/> | | |
| 09 | Custom Logger Unity Tool
Editor extension for filtered, colour-coded, time-stamped runtime logs with QA session export. Unity • Editor scripting | Internal tool |
| <hr/> | | |
| 10 | REST API Async Client (Unity)
Reusable HTTP client built on HttpClient + async/await — token auth, retries, JSON, error paths. Unity • C# • Networking | Internal tool |
| <hr/> | | |
| 11 | AR Location (AR Foundation + Mapbox)
GPS-anchored AR experiences with route markers, geofenced triggers, and a story-driven quest system. Unity • AR • GPS | Futuristic Business Solutions |
| <hr/> | | |
| 12 | AR Coloring & Multi-Image Detection
Image-target AR with 3D-model alignment to children's drawings; parallel multi-target tracking. Unity • AR Foundation | Rishu's Infotech |
